Technical view

S&P 500 Index, daily

The S&P 500 has finished a-b-c correction at a support at 1260 and reached 1300. Another leg up is still possible with resistance around 1376. However, as soon the 5th of V is finished, more severe correction is likely to come.

A pessimistic midterm target seems to be around 1000, after the pattern is completed and (C) starts.

Current support levels are at 1260, 1230, 1180, 1130, 1092, 1041, 1010, 980, 950, 870.

Resistance levels: 1295, 1350, 1376.

Dow Jones Stoxx 600 Europe Index, daily

The index has broken the pivot around support 274 and found resistance at 264.

This points to 258, 243, 210 levels as the final targets of the downward leg (C) after rebound to 275 is finished.

Important support levels: 263, 256, 243, 238, 217.

Important resistance levels – 277, 288

Daily Market Report

EURUSD, daily

EURUSD current pattern is likely a zigzag in a wide triangle, which has its lower bound around 1.17. After triangle upper line around 1.425 is tested, another leg down with a support around 1.26 should unwind.

However, as the upper descending line at 1.37 is broken up, the probability of testing another major resistance at 1.43 has increased. If 1.4336 level is broken and held, next major resistance will be at 1.4687, 1.5255.
