## Technical view

### S&P 500 Index, daily

The S&P 500 has finished a-b-c correction at a support at 1260 and reached 1338. Continuation of the move up is still possible with resistance around 1376-1400 as v-th in 3 in C unwinds. However, as soon the 5<sup>th</sup> of V is finished, more severe correction is likely to come.

If the pattern started on February, 18, is a flat correction, we should see C impulse to unwind in the coming days with a support at 1250.

A pessimistic midterm target seems to be around 1000, after the pattern is completed and (C) starts.

Current support levels are at 1260, 1230, 1180, 1130, 1092, 1041, 1010, 980, 950, 870.

Resistance levels: 1295, 1350, 1376.

Daily Market Report

**Dow Jones Stoxx 600 Europe Index, daily**

The index has found resistance at 264. Leg up with a target around 298 is likely to go on after the retracement is finished.

However, If the pattern, started on February, 18, is a flat correction, we should see C impulse to go on in the coming days with a support at 263, 256.

Important support levels: 263, 256, 243, 238, 217.

Important resistance levels – 277, 288

Daily Market Report

EURUSD, daily

EURUSD current pattern is likely a zigzag in a wide triangle. After triangle upper line is broken 1.425, resistance levels at 1.455, 1.4687 will be tested. Final target of the current leg may be around 1.5255.

However, if the pattern started in June, 2010, is an ABC zigzag up, reversal may finally lead us to new lows at 1.17 later this year.
